# About FDC

Developer Circles from Facebook is a renowned global network of communities established by developers, for developers. Each of the local communities work with the same motto - to help developers reach the zenith of their potential. Likewise, Facebook Developer Circles: Vellore, is one such local community created in Vellore, which serves as a forum for tech enthusiasts and developers to use Facebook as a platform to build, interact and collaborate with each other.

Several budding and skilled developers work together as a community in different fields of emerging technologies. FDC Vellore conducts many events, webinars and sessions in and around Vellore to keep up with its motto. Also, it gives an impetus to the the nascent startups around the area by conducting meet-ups including the community leads.

# About Docker Community

The Docker Community offers developers opportunities to engage with other Docker enthusiasts whether it is through events, online resources and various Docker programs. Docker is a containerization tool which provides a way to build, ship and run, any app anywhere. The whole idea of Docker is for developers to easily develop applications, ship them as Docker images which can then be deployed as containers anywhere.

Docker community brings together developers and engineers. The community guides developers how to use Docker for modifying code and streamline application development, while operations gain support too quickly and flexibly respond to their changing needs. It provides the huge platform for new start-ups and for proceeding their carriers.

# About HACK 360

Facebook Developers Circles: Vellore and Docker Community : Vellore are conducting a 24-hour hackathon, called Hack 360, from 21st of February to 22nd Feb, 2020.

Developers from Vellore, Chennai and Bangalore will be participating in the hackathon thereby, getting them a huge platform to brainstorm, think out of the box and present their innovative ideas, speaking through their code. Technical experts are being called from different colleges and companies to fairly judge the hackathon.

This hackathon would be competitive and very different from the other numerous hackathons conducted because of the distinct and unprecedented tracks and themes included. The participants would be making something according to the theme chosen by them and the basic idea of all the themes would be the better-

# Past Events

## Build Days

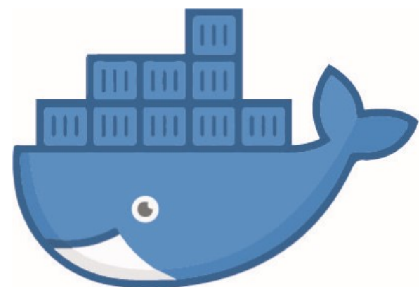

The objective of Build Days is to bring together developers and community leaders from across the globe to create solutions that help people build community and bring the world closer together.

Participants were asked to create solutions that use at least one Facebook developer product, such as Groups, API, Messenger or React.

## Docker 101

Docker 101 was a hands on workshop about Docker for students of VIT, Vellore. The purpose of the workshop was to provide beginners with an insight in the Docker containerisation journey and enable them to start a docker breath taking voyage.

Find us Here!

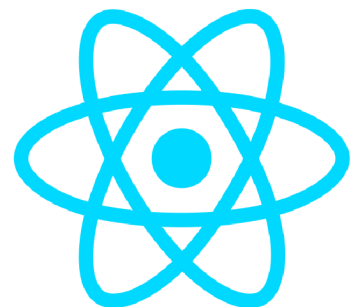

## Advanced Python

Advanced Python was an interactive, hands on session on data handling and analysis using python libraries such as numpy, keras, matplotlib, etc. It was a captivating python session for data science enthusiasts.

## ReactJS 101

The purpose of the session was to spread awareness and familiarise attendees about react concepts such as states and props. These concepts were further employed to build basic introductory apps.

# Why Sponsor Us?

Both Docker Community: Vellore and Facebook Developers Circle: Vellore are communities dedicated to the task of helping technical enthusiasts improve their technical knowledge base and skill sets.

This hack is the result of this common goal. The objective behind this hack, is to set a new standard for hackathons conducted in and around Vellore. To bring together tech enthusiasts to showcase their skills while helping make India a better country with their varied skillsets.

We as a community aim to provide a medium through which we can connect the upcoming technologies and trends with the youth inspiring to be technical professionals. This will enable students to be industry ready and provide industries with the required skill sets. Sponsoring us will help you not only promote your company but also help make students industry ready. By making them industry ready you are creating future employees that fit your requirements aptly. We have six sponsorship deals for you to choose from according to your requirements.
